MEMORANDUM FOR: Director of Scientific and
Weapons Research

SUBJECT : Senior Review Panel Comments on the
New Science and Weapons Daily Review

The Senior Review Panel is an interested reader of the new OSWR Daily Review, and we have one minor suggestion to make to improve its readability. An index page containing a list of article titles and page numbers would be most helpful. This would allow the cursory reader to be quickly informed of its contents, and the serious reader to rapidly locate articles in which he is particularly interested. Such an index was a standard feature, which we found most useful, of the old OSI Daily Review.
